PROFESSIONAL SUMMARY

Full Stack Developer with 2.5+ years of production experience building and shipping scalable MERN and Ruby on Rails applications, REST APIs, and real-time data systems across high-traffic consumer products and internal CRM/operations platforms. Track record of independently owning greenfield features end-to-end and refactoring large React codebases. Starting an Executive M.Tech in Artificial Intelligence at IIT Jodhpur (Aug 2026) to build expertise in Machine Learning, Deep Learning, NLP, Computer Vision, and MLOps, with the goal of transitioning into AI/ML engineering.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), Python, Ruby, HTML5, SCSS/CSS Modules

Frontend: React 18, Next.js 14, Redux, Recoil, Zustand, Tailwind CSS, Radix UI / Shadcn UI, MUI, Formik/Yup, Vite

Backend and Data: Node.js, Express.js, Ruby on Rails 8, PostgreSQL, REST API Design, Pundit RBAC

Cloud, DevOps and Observability: AWS S3/CloudFront, GitHub Actions (CI/CD), Docker, Sentry, GTM/Clevertap, n8n

PROFESSIONAL EXPERIENCE

Isprava / Lohono Stays

Jul 2024 – Present

Software Developer

Mumbai, India

- Core frontend engineer on lohono.com, owning the full booking funnel (discovery, listing, detail, checkout, Razorpay) and shipping greenfield surfaces from scratch – Property Cluster (multi-villa) with full-stack Express review/recommendation APIs, Referral Programme, Harmony Weddings, and Schedule Callback – across 100 commits and PRs over 21 months.
- Built the Lohono Trip Planner guest app from scratch (React 18, TypeScript, Vite 6, Tailwind CSS, Recoil, Radix/Shadcn UI) with 11+ custom REST API hooks for meal ordering and a multi-guest Web Check-in KYC flow; refactored a 2,300-line monolith into hook-driven modules, removing 1,100+ lines across 81 files – 9 PRs and 25+ tickets in 2.5 months.
- Delivered the Isprava LMS internal CRM across 5 product verticals (React 18, MUI, JsSIP/WebRTC, Sentry) – a 15+ component villa food-ordering system with KOT printing, Client Ledger with preview-gated downloads, Delivery Tracker, and the Rental Trip Details revamp; centralized a shared currency utility and added Jest/RTL coverage.
- Sole frontend owner of the Solene membership platform – multi-step application form with complex validation, preview mode, and cross-page state retention; rebuilt the marketing site, shipped JSON-driven legal pages, and configured SEO sitemap, AWS S3/CloudFront, GitHub Actions CI/CD, and n8n webhook submissions.

Isprava / Lohono Stays

Jan 2024 – Jul 2024

Front-end Developer Intern

Mumbai, India

- Engineered an appointment scheduling system (date picker, time-slot carousel, rescheduling, edge-case handling) and a scroll-aware calendar positioning hook that resolved recurring date-picker defects across listing, detail, and collection pages.
- Built a multi-step lead capture form (Next.js 14) with OTP verification, Google reCAPTCHA v3, UTM tracking, and GTM event instrumentation – an end-to-end form pipeline from UI through CRM lead submission.

PROJECTS

AI / ML – Planned Coursework Projects (IIT Jodhpur, from Aug 2026)

Upcoming

- Small hands-on projects to be built through the program: an image-classification CNN (Computer Vision), a text-classification / sentiment-analysis model (NLP), and a containerized ML-Ops deployment that serves a trained model over a REST API.

Isprava API – Backend REST Services and RBAC (Ruby on Rails 8, PostgreSQL)

2024 – Present

- Architected the Homeowner Approvals platform from scratch (19 files, 615 lines in a single delivery) – V2 REST controllers, property/opportunity-scoped service objects, approve/reject workflows, Pundit RBAC, ActiveAdmin, decorators, and ACL/category migrations; built phased GRM checklist APIs with admin-gated uncheck and audit logic.

The Chapter – Marketing Platform (Next.js 14 Static Export, React 18, TypeScript)

2024 – Present

- Built campaign landing pages and a reusable lead-capture form system with a custom 4-digit OTP phone-verification module wired to REST lead APIs and GTM conversion events; shipped a dynamic slug-routed Press Center and drove a WebP asset pipeline that cut hero frames from roughly 24MB down to 397KB.

EDUCATION

Indian Institute of Technology, Jodhpur (IIT Jodhpur)

16 Aug 2026 – 2028 (Expected)

Executive M.Tech in Artificial Intelligence (PG Diploma to M.Tech track)

Online/Hybrid

- Upcoming coursework: Machine Learning, Deep Learning, Artificial Intelligence, Optimization for Data Science, Advanced Data Structures & Algorithms, ML-Ops & DL-Ops, NLP, Computer Vision, and Advanced AI & Autonomous Systems.

Centre for Development of Advanced Computing (C-DAC)

Mar 2023 – Aug 2023

PG-DMC, Mobile Computing

Pune, India

Chhattisgarh Swami Vivekanand Technical University (CSVTU)

Jun 2017 – Jun 2021

B.Tech, Electrical Engineering

Bhilai, India

CERTIFICATIONS

- Java Data Structures and Algorithms + LeetCode Exercises – Udemy
- Java and Spring Framework for Beginners with Spring Boot – Udemy
